

# ABOUT US

We have a huge passion for students and feel that High school students are an extremely important part of the community.

We believe that God uses students every day to make an impact in their schools, in their families, on their sports teams and with their peer groups. We want every student to understand that **their life is their mission.**

We also know that the world students live in is hard, and we want to invest in them and support them. There are a lot of ways we do this including: NRG, FUSE, ELEVATE and Trips. But the most important way we do this is just by having our adult leaders share life with students. **We believe relationships change lives.** Our hope is that every student finds friends and leaders to have a connection with, and that these relationships help them figure out Jesus, life and all the hard stuff in between.
